

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

The Euro VNAV Fund

a sub-fund of Fidelity Institutional Liquidity Fund plc

Class A Accumulating Shares (ISIN: IExxxxxxxxxx)

This fund is managed by FIL Fund Management (Ireland) Limited

Objectives and Investment Policy

- The fund aims to maintain capital value and liquidity while producing a return for investors in line with money market rates.
- The fund invests in a diversified range of short-term instruments, including high quality money market instruments (including government securities, bank obligations, commercial paper and other short-term obligations), high quality securitisations and asset-backed commercial paper, deposits, repurchase agreements and reverse repurchase agreements, and units or shares in eligible money market funds.
- Income is accumulated in the share price.
- Shares in the fund can be bought and sold on any day on which the banks are open for normal banking business in London and same day settlement of the proceeds for subscriptions and redemptions is facilitated by electronic funds transfer.
- The fund is a Variable Net Asset Value Money Market Fund and operates as a Short-Term Money Market Fund..
- The fund is actively managed without reference to a benchmark.

For full details of the objectives and investment policy please refer to the prospectus and relevant supplement.

Risk and Reward Profile

- Historical data may not be a reliable indication for the future.
- The risk category shown is not guaranteed and may change over time.
- The lowest category does not mean a “risk free” investment.
- The risk and reward profile is classified by the level of historical fluctuation of the net asset values of the fund, and within this classification, categories 1-2 indicate a low level of historical fluctuations, 3-5 a medium level and 6-7 a high level.
- The value of your investment may fall as well as rise and you may get back less than you originally invested.
- There is a risk that the issuers of bonds may not be able to repay the money they have borrowed or make interest payments. While we seek to mitigate this, the fund may be exposed to the risk of financial loss if it invests into an instrument issued by an entity that subsequently defaults on its borrowings. Losses may also be realised if an entity that the fund is exposed to ceases to make interest payments over a period of time or indefinitely. Bond prices have an inverse relationship with interest rates such that when interest rates rise, bonds may fall in value. Rising interest rates may cause the value of your investment to fall.
- Investment in a Money Market Fund is different from an investment in deposits, in particular, the principal invested in a Money Market Fund may fluctuate and the risk of loss of the principal is to be borne by the investor.
- The fund is not a guaranteed investment. It does not rely on external support for guaranteeing the liquidity of the fund or stabilising the net asset value of shares in the fund..

For full details of the relevant risks reference should be made to the risk factors sections of the prospectus and relevant supplement.

Charges for this fund

The charges you pay are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.
